Fellowship in Wildlife and Conservation Medicine

General Program Description

- CROW is a nonprofit wildlife hospital and rehabilitation center providing care for native and migratory wildlife on the Gulf Coast of Southwest Florida.
- CROW's fully equipped wildlife hospital admits over 6,000 patients per year including more than 200 different species of birds, mammals and reptiles.
- The goal of wildlife rehabilitation is to return sick, injured or orphaned wild animals back to the wild. The Student Program is designed to augment the educational pursuits of natural science, veterinary, and veterinary technician students.
- Students are supervised and assisted by a full-time, boarded specialist veterinarian, veterinary interns, Certified Veterinary Technicians, wildlife rehabilitators, and other staff and volunteers.
- Emphasis is placed on the student gaining an understanding of the entire rehabilitation process from admittance to release, evidence-based wildlife and conservation medicine, as well as the One World, One Health concept.

Fellowship Students (26 weeks/6 months)

- Fellowship students participate in daily hospital and rehabilitation center activities with a focus on care of orphans and general husbandry.
- Daily activities include observation, handling, restraint, and physical examination of various wildlife species, nutritional management for wildlife patients, feeding and care of orphaned babies, maintenance and cleanliness of outdoor enclosures and hospital cages with emphasis on stress reduction, disease control and enrichment.
- They also participate in ongoing clinical research and give Education Center presentations to the public.
- They will be scheduled outside on a weekly basis with our rehab staff to care for all patients housed outside and may have the opportunity to work with our ambassador animals.
- They participate in weekly didactic and case rounds.
- Dependent on case load, they may observe physical exams and concurrent diagnostics, observe wildlife anesthesia and surgery.
- They may participate with the rescue and release of various species *as available*.
- **Fellowships are more rehab based and students can expect to be scheduled in our baby rooms more often than our ICU floor.**

Duration

- The externship program lasts 26 weeks (6 months) depending on the student's needs and program availability.
- Program openings are available throughout the year and applications are considered as they are received.
- On-site housing is available for \$75 per week.

Location

- CROW operates on a 12.5-acre campus on Sanibel Island, Florida. The organization's hospital and visitor education center are located adjacent to J.N. Ding Darling National Wildlife Refuge.
- Beaches and local restaurants are a short distance from campus.
- The mainland of Fort Myers past the Sanibel Causeway is 15 minutes away from CROW.

Requirements

- Applicants must be over 18 years of age.
- A minimum of 1 year animal care experience is **REQUIRED**.
- All **accepted** applicants must agree to and sign rules and regulations in regard to commitment, housing, dress code, code of conduct, photo policies, etc. along with liability waivers.
- Fees required are a \$125.00 program fee.
- *Fellows are paid \$150 bi-monthly (twice a month).*
- **Proof of COVID-19 Vaccination is REQUIRED upon acceptance.**
- **All accepted applicants must provide proof of current tetanus immunizations and proof of pre-exposure rabies series.**

Apply

- Visit our website at www.crowclinic.org and download and return completed application materials to students@crowclinic.org or to PO Box 150, Sanibel, FL 33957.
- For questions not answered on the website or in the application packet, please email students@crowclinic.org
- **THERE IS NO DEADLINE FOR APPLICATIONS.** Applications are accepted year-round and are processed as they are received.
